

QT206

HART to MODBUS Converter

Salient Features

- Simple to use.No configuration required.
- Connect multiple HART Clients to a single QT206.
- Poll HART data on MODBUS RTU protocol through RS485 or RS232 ports
- Get all HART parameters values and units from as HART Client in a single MODBUS query
- Two register blocks for HART parameters for easy query.
- Ideal for remote data acquisition and SCADA applications.
- Provision to connect multiple QT206 in single Daisy chain

Hardware Specifications

- HART port
- RS485 and RS232 port
- 12-24V DC input power
- Operating Temperature: -40 ~ +85c
- Din Rail mountable enclosure

Applications

- Remote Monitoring of HART devices like Flow meters and sensors
- Data acquisition from one or more remote HART Client devices
- Easy Integration HART Clients to SCADA
